

# 1

## Collecting and Organizing Data

---

Action (continued)

**e)** Describe three or four conclusions you can draw from the data. Explain why each conclusion makes sense.

**f)** What questions about your data do you not have enough information to answer?

**2. a)** Find data related to another topic.

This time, look for data in a graph that show how something changes over time.

**b)** How could you reorganize the data you found to create a summary table or chart?
