

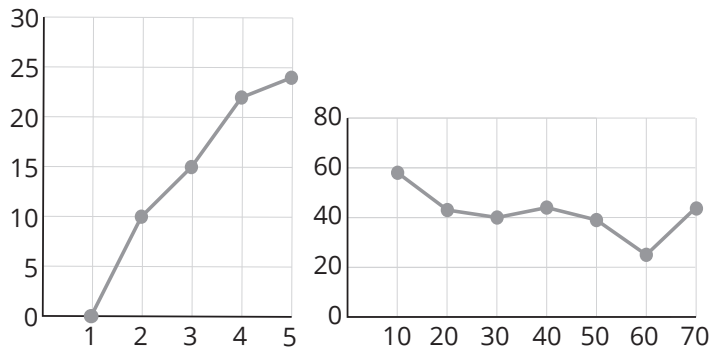

## Graphing Data

### Performance Task

Create and interpret a continuous line graph.

1. Choose a topic and collect data.  
Explain why it would make sense to graph your data on a continuous line graph.
2. Organize or reorganize your data if you wish.
3. Graph your data. Use an appropriate scale for your graph.
4. Explain why you chose the scale you did.
5. Draw several conclusions from your graph.
