

The Rounding Rap!

**Find the place value and circle that digit.
Now move to the right and underline – get it?**

0 – 4, circle stays the same

5 to 9, add one is the game

Now flex your muscles like a hero

Digits to the right change to zero.

All other digits stay the same.

Yo! You're a winner in the rounding game!

Example: Rounding to the nearest *thousand*

364,693

**Find the digit in the thousands place
and circle it.**

3 6 4, 6 9 3

Move to the right and underline the 6.

3 6 4, 6 9 3

**Look at the underlined digit. Is it between
0-4? Then the 4 stays the same.**

**If it is between 5-9, then add one to the
circled digit.**

**Now, under the 4 write a 5 because six is
between 5 and 9.**

3 6 4, 6 9 3
5

**Now all of the numbers to the right of the
five change to zero.**

3 6 4, 6 9 3
5, 0 0 0

All of the digits to the left stay the same.

365,000
